For Immediate Release: May 11, 2009

**AeroLEDs Pulsar ExP, an all LED Nav/Strobe/Position that does not require an external power supply**

The Pulsar ExP Nav/Strobe/Position light for experimental use was designed from a “clean sheet” utilizing advanced mechanical/electrical computer modeling and optical ray-tracing software to accurately predict and optimize the performance of the final product. Pulsar ExP retails for \$895.95 and includes the following features:

- **Lifetime Buy or 50k hours of use**
- **Zero Maintenance**
- **Reduced Power Consumption (up to 80%)**
- **Extended Light Performance (no “accelerated light degradation” common to legacy products);**
- **Elimination of RF Noise**
- **Reduced System Weight (10oz per pair )**
- **Reduced Aero-dynamic Drag**
- **Direct Retro-Fit to traditional legacy lighting**
- **Overheat Protection**
- **Requires No External Power supply**

###
